The Game

So what is this *switcheroo chaos* all about..?

A motley band of survivors find themselves marooned on an island. But there's a twist to their fate..

Look what I found!

An old map shows various islands nearby, each with the irresistible promise of...

TREASURE!

Battle over lava for treasure...

... then switch mid-game to an icy cold island...

... only to switch once more to high in the skies...

SWITCH!

Can you quickly pick up where you left off on each island? If so, you can be the one who claims the most treasure!
